**SUBJECT: NOVEMBER IS NATIONAL LUNG CANCER AWARENESS MONTH
Time: 30 seconds**

November is National Lung Cancer Awareness Month. Lung cancer is the nation's leading cause of cancer-related death. More than 150,000 Americans will die from lung cancer this year. Smoking is a leading cause of lung cancer, but not everyone who smokes develops cancer.

Early detection with C-T screening has been found to lower the risk of death in certain high risk persons based on their age, general health, and smoking history.

For more information visit *RadiologyInfo.org*.
