

## RSNA Pneumonia Detection Challenge Acknowledgements

RSNA would like to thank the National Institutes of Health Clinical Center for creating the Chest X-Ray dataset [5], which is the foundation of the datasets used in this challenge. Learn more about the NIH datasets:

We also wish to recognize the radiologists from the Society of Thoracic Radiology and RSNA who contributed the considerable effort required to annotate the datasets in preparation for the challenge:

Special thanks to Anouk Stein, MD of [MD.ai](#), who contributed the annotation tools used in creating the challenge datasets, helped to organize the team of annotators and provided extensive consulting on the annotation process.

Special thanks to Jayashree Kalpathy-Cramer, PhD, Massachusetts General Hospital; Peter Chang, MD and John Mongan, MD, PhD, University of California - San Francisco; and George Shih, MD, Weill Cornell Medicine for their work in validating the evaluation metric used in the challenge.

Special thanks to [Kaggle](https://www.kaggle.com/) for serving as the competition platform and for providing prize money for competitors in the challenge.

Finally, thanks to the members of the RSNA Machine Learning Steering and Machine Learning Data Standards subcommittees, who were responsible for designing, organizing and conducting the challenge in collaboration with Kaggle:

- Katherine P. Andriole, PhD - MGH & BWH Center for Clinical Data Science
- Falgun H. Chokshi, MD - Emory University
- Brad Erickson, MD - Mayo Clinic
- Adam Flanders, MD - Thomas Jefferson University
- Safwan Halabi, MD - Stanford University
