SUBJECT: SEPTEMBER IS PROSTATE CANCER AWARENESS MONTH

Time: 30 seconds

September is Prostate Cancer Awareness Month.

Prostate cancer is a leading cause of cancer death in American men. Black men, men over 65, and those with a family history of prostate cancer are at a higher risk.

Early prostate cancer often shows no symptoms. If you have concerns about prostate cancer, ask your doctor about available diagnostic tests and whether they're right for you.

For more information, visit Radiology-Info-dot-org.
