Data Annotators

The challenge organizers wish to thank the Society of Thoracic Radiology for help in recruiting expert radiologists to label the RSNA-STR Pulmonary Embolosim CT (RSPECT) dataset used in the challenge. The Society of Thoracic Radiology (STR), founded in 1982, is a premier professional organization dedicated to promoting cardiothoracic imaging for the excellence in patient care through research and education.

The Radiological Society of North America and the Society of Thoracic Radiology organized more than 90 volunteers to label over 12,000 exams for the RSNA-STR Pulmonary Embolism CT (RSPECT) dataset.

The following radiologists contributed their time and expertise to label data for the challenge:

More than 500 Exams
