# Results

## Pre-intervention

Outcome measure	Average time (min)	Standard met
CXR/pelvis	13.1	71%
Extremity	22.3	68%
Time to CT	49.6	83%

## Post-intervention

Outcome measure	Average time (min)	Standard met
CXR/pelvis	7.3*	96%
Extremity	17.5*	85%
Time to CT	44.8*	87%

\* Denotes statistical significance (two sample T-Test)
